

*Travis Thompson*

If you are not aware then you do not have the duty make the correction. When you become aware they you have the duty to yourself and your fellow citizens whom you serve to act accordingly. Your character will decide how you respond to your new found duty. It is an established fact supported unanimously by the U S Supreme court that the constitution requires the lands within the state be under state control. The land for the Federal Governments use is to be granted to them by the state legislature.

The constitution was not written in two parts. One for states East of Colorado and the second for states West of Colorado. There is however a staggering difference between the states in respect to the amount of federal land retained for federal control. This difference is marked by a clear distinct line that runs north to south at this midpoint of our county.

Now is the time for Idaho to claim the same authority under the same constitution as the state's East for Colorado claimed and demand our equal footing with those states.

Now is the time to act, if fact it is a violation of your oath of office not to.

Thank you for taking the time to come to the Northern part of our great state. We appreciate the opportunity to inform you of how we would like to be represented.
